

**International Law Association**  
**Recommendation on Pollution Control**  
**Hamburg, August 1960**

from

Report of the Forty-Ninth Conference, held in Hamburg, 8-12 August 1960 (London, 1961), pp. xvi-xviii

1. For the control of water pollution in accordance with New York Recommendation 8, pollution-control commissions should be set up for each separate basin by agreement among the co-riparian States of that basin.
  
2. To define the scope and responsibilities of pollution-control commissions for a drainage basin, preliminary studies should be made by the appropriate agencies dealing with the control and abatement of water pollution.
